

RoHS certificate of compliance

Use restriction of some of dangerous substances in electric and electronic equipments (RoHS)

European directive **2011/65/EU** (RoHS directive) and **Council of 8 June 2011** restricts the use of some of dangerous substances in electric and electronic equipments.

Based on information transmitted by our suppliers, we (ECOFIT) tell that our products are RoHS conform and can be ordered as RoHS conform on and after the day of the issue of this certificate.

All products which are not declared "RoHS conform" in our catalog and on the technical datasheet are not RoHS conform.

Confirmation of conformity state by our suppliers implies that products do not contain restricted substances in a level higher than values fixed by article 4(1) **of RoHS ANNEX II** directive or that withdrawal of restricted substances is not technically possible and that use of those substances in a level higher than values fixed by the directive is authorized for special applications which are listed in the Annexe of RoHS directive.

Maximum levels of restricted substances in homogeneous material are:

Lead	0.1%
Mercury	0.1%
Hexavalent chromium	0.1%
Polybrominatedbiphenyls (PBB)	0.1%
Polybrominateddiphénylethers (PBDE)	0.1%
Cadmium	0.01%

ECOFIT relies on informations provided by suppliers but does not make any chemical analysis or analysis of supplied material, components nor of industrial chemical products.
